SmartDog - CSF001

sleep peacefully while SmartDog guards your assets in Cold storage facilities

1.

Do you want to avoid spoilage of goods due to failure of temperature or humidity control equipment?

2.

Do you want to get alerted when door of your cold storage facility is opened?

3.

Do you want to prove that you stored goods at right temperature to your customers and regulatory authorities?

SmartDog meets all the above needs. It is a robust temperature and humidity monitoring device that can be installed in your cold storage facility.

INTECOG

Key Features

Real-time temperature and humidity tracking
Smartdog measures temperature and humidity of goods at regular intervals and sends data to a mobile app.

Asset condition alerts
Get notified on app when temperature/humidity goes beyond upper or lower limits set by you.

Access data anytime and in any form
Access temperature logs in both excel and graphical formats from the mobile or web app. Data could also be sent periodically over SMS.

Door open detection (optional)
Get notified on app when door of your cold storage facility is opened.

Real-time location tracking (optional)
View real-time location and location history of your assets in mobile app.

What's so special about Smartdog?
- Built by IIT and NIT engineers.
- Calibrated by NABL accredited laboratories.
- Longest battery life in the industry.
- Unlimited warranty.

INTECOG

Technical specifications	
Temperature Sensing	−40 to +125 °C , +/−0.2 °C
Humidity Sensing	0 to 100 %RH , +/−2.0 %RH
Dimensions (L x W x H)	200 x 43 x 104mm
Weight	100g
water proof rating	IP65
Battery life	90 days
